Open to remote roles and relocation opportunities in Europe

PROFESSIONAL SUMMARY

Software Developer with professional experience since 2019, including roles at Safeweb and Roko and strategic projects for Electrolux. Specialized in web applications, REST APIs, systems integration and high-volume automation using C#, .NET, Entity Framework, SQL Server, Angular, Blazor, Microsoft Azure and AWS. Experienced across the full development lifecycle, from requirements and business logic to database optimization and production delivery, in multidisciplinary teams using Agile and traditional methodologies.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, HTML5, CSS3, SCSS

Frameworks: .NET, Entity Framework, Angular 14, Blazor

Cloud & Data: Microsoft Azure, AWS, SQL Server, MySQL

Engineering: REST APIs, systems integration, full-stack development, database optimization, scalable applications, Git, Scrum and Waterfall

PROFESSIONAL EXPERIENCE

Software Developer | Roko — 2024–2025

- Developed back-end services and business logic in C# and .NET for strategic Electrolux projects, supporting automated processing of high-volume operational data.
- Replaced manual workflows with automated solutions, improving operational efficiency and processing scalability.
- Built and maintained applications with Entity Framework, SQL Server and Microsoft Azure, focusing on performance, data integrity and security.
- Optimized SQL queries, supported systems integrations and collaborated with multidisciplinary teams using Scrum and Waterfall.

Software Developer | Movanto — 2023

- Developed full-stack web solutions with C#, .NET, Blazor, HTML5 and CSS3, delivering responsive interfaces and maintainable back-end functionality.
- Used AWS services to support scalable, high-performance cloud applications and managed MySQL databases, optimizing queries and preserving data integrity.

Software Developer | Safeweb Information Security — 2019–2022

- Delivered full-stack solutions with C#, .NET, Angular 14, TypeScript, SCSS, SQL and Microsoft Azure throughout the development lifecycle.
- Designed and integrated APIs to connect internal systems and improve application communication.
- Developed responsive interfaces and maintainable back-end services for information-security products, while optimizing SQL queries and applying data security and integrity practices.

Web Development Intern | City of Sapucaia do Sul – COMDICA — 2017–2018

- Developed and maintained responsive web interfaces using HTML, CSS and JavaScript, improving usability, communication and teamwork.

EDUCATION

Associate Degree in Systems Analysis and Development — LaSalle University | 2022–2025

Technical Diploma in Information Technology — ULBRA São Lucas | 2017

CERTIFICATIONS

CS50: Introduction to Computer Science — Harvard University (edX) | Java Object-Oriented Programming — LinkedIn | Agile Software Development — LinkedIn | Git and GitHub — Digital Innovation One

LANGUAGES

Portuguese: Native | **English:** Advanced reading, writing, speaking and listening
